

Stony Creek Association BOD

Ref – Negotiating w/ Legacy Theater

I understand that the town has decided against repealing the permit and that negotiations are being considered with Legacy etc. .

I confess ignorance on one point and beg to be enlightened.

A recurring theme in various meetings has been that the Theater as it stands has inadequate bathroom / septic capabilities for what is being proposed. While the Town may not consider this important in reevaluating the permit, surely the East Shore Health District will eventually have a lot to say if it is true.

My experience building a new house in Stony Creek was that ESHD had to be included in just about everything.

Has anyone approached them or investigated the process / requirements / eventual channels for what would seem to be inevitable complaints?

Seems to me that until the septic is resolved that we are wasting time on parking, hours, permits, weddings, etc.

I am not suggesting that any one on the Board needs another job in this process – you've all spent way to much time on it already. I would be happy to investigate this myself if the committee / board deems it useful.
