Subject: Stony Creek Christmas Tree

Hi Dan (Stony Creek Association)

As a member of the Branford Forest Commission I was thinking it might be a good idea environmentally to plant a permanent Christmas Tree in our triangle rather than have a new one cut each year .

We would want to get some expert feedback as to whether conditions including available natural water would make this viable and look at growth rate ,longevity and terminal height of the coniferous species chosen which ought to be native. Any thoughts on this?

Best
Chris
