**Attachments:** TIR Pedestrian Bowling.jpg

Hi Dan

Just to emphasize our point about speed and pedestrian risk in the beach area, I've included a Google Earth based diagram. Times are transit times to a hypothetical pedestrian at TIR 3 from either TIR 1 or TIR 2, roughly 320 feet away. Northbound cars accelerate out from around the Memorial Fountain stop sign and southbound cars round the curve often at excessive speeds on the straight-away. Since the repaving several years ago, it has become the "Stony Creek Speedway".
